SUMMARY

Graduated in 2017 with a Bachelor of Computers degree from the University of Banten Jaya. With over six years of experience, I have expertise in IT automation, programming, and website development. Skilled in analyzing problems, problem solving and teamwork, I would very much like to bring value to your organization through innovative solutions and dedication to quality results.

FORMAL EDUCATION

- 2001-2007 | SDN 1 Kota Serang
- 2007-2010 | SMPN 2 Kota Serang
- 2010-2013 | SMAN 2 Kota Serang
- 2013-2017 | Universitas Banten Jaya

WORK EXPERIENCE

IT INFRASTRUCTURE, NETWORK, & PROGRAMMING - PT. BCS Logistics April 2025 - April 2026 Cilegon

1. Managed and maintained all IT infrastructure, including servers, hardware, and software, to ensure smooth business operations.
2. Designed, implemented, and administered network topologies (LAN/WAN) to ensure stable and secure connectivity.
3. Performed troubleshooting and routine monitoring of systems and networks to resolve technical issues promptly.
4. Implemented and configured network security measures, such as firewalls and antivirus, to protect company data.
5. Developed and maintained internal applications using PHP and the CodeIgniter framework to support logistics processes.
6. Conducted regular data backups and ensured the effectiveness of data recovery systems.

IT Automation, PT. POSCO DX INDONESIA August 2019 - July 2024

1. Automation System Maintenance Level 2:
 - Performs routine maintenance on Level 2 automation systems at the plant, including daily, weekly, and monthly inspections.
 - Ensuring the system continues to operate optimally and supports production processes.
2. Troubleshooting and Troubleshooting:
 - Analysing and fixing problems that occur in Level 2 automation systems.
3. Layer 2 System Performance Management:
 - Manages and monitors the performance of Layer 2 systems to ensure stable and efficient operation.
 - Conduct periodic tests and evaluations to improve system efficiency.
4. Field Operations Technical Support:
 - Provide technical support to field teams in the course of operational activities.
 - Train and guide teams on the use and maintenance of automation systems.

IT Support - Engineer On Site, PT. Tangga Karir Kita December 2017 - July 2019

1. Monitoring the operation of the NPKTOS system at PT. PELINDO 2 Ciwanda Cilegon is running properly.
2. Verify that the reports on the system match the reports in the field.
3. Ensure that the autogate system is functioning properly, so that vehicle traffic carrying goods can go in and out of the port without any obstacles.
4. Create a ticket if there is a problem in the NPKTOS system so that level 2 teams can improve the problem.

CERTIFICATE TRAINING

- Certificate Introduction to Information Security By Cyber Academy Indonesia
- Belajar Basis Data By Programmer Zaman Now
- Fundamental Cyber Security By CodingStudio
- Fundamental Command Linux By CodingStudio
- Network Engineer Class By Surosowan Cyber Community.
- Certificate Python dasar By Skilvul.
- Certificate Python Lanjutan dasar By Skilvul.
- Python Fundamental for Data Science By DQLab
- Python for Data Professional Beginner - Part 1 By DQLab
- Python for Data Professional Beginner - Part 2 By DQLab
- Quality Assurance Fundamental By Myskill.com.

PROJECT EXPERIENCE

- Member Individual Management System (2026) : Developed a comprehensive web-based membership platform to streamline member registration, individual data handling, and automated verification workflows.
- AI Video Generator & Smart Clipper Engine (2026) : Engineered an automated short-video production pipeline using Python, Gemini AI, Edge TTS, and FFmpeg to auto-generate viral clips and scheduled YouTube uploads.
- Automated Crypto Trading Bot & Analytics (2026) : Built an automated trading engine integrated with Indodax API, executing real-time buy/sell orders based on technical indicators (RSI/MACD) and WebSocket price feeds.
- Presensi MyBCS — Web System & Mobile API (2025-2026) : Developed full-stack web dashboard (PHP/CodeIgniter) and built secure RESTful APIs for the mobile attendance app to streamline employee tracking, geo-location verification, and payroll reporting.
- Member.aspikom.org - Membership Prodi (2022-2026) : Developed a web-based membership management system to streamline data handling.
- Seventhsense.id (2022-2023) : Responsible for web development, ensuring the platform delivered impactful and engaging solutions.
- IICACS.COM (2024) : Developed and optimized a website to enhance the user experience and streamline content management for the IICACS platform. Focused on responsive design, seamless navigation, and ensuring effective integration with backend systems for efficient data handling.
- Makadaya.org (2024)
- Radiobudiluhur.com (2024)

TECHNICAL SKILL

Programming Languages & Web Development

- HTML, CSS, JavaScript, PHP, Python, C++, MySQL
- Laravel, CodeIgniter, WordPress
- Web scraping, Data analysis (using Pandas, PyMySQL)
- Python for Data Science and Automation

Design & Multimedia

- Microsoft Office Word, PowerPoint, Excel
- Logo, banner, flyer, and poster design (using tools like Canva)

Technical Tools & Systems

- IT automation, Data processing
- Troubleshooting and IT support (Hardware/Software/Network)
